

ProMate 6.0

EFFICIENTLY REDUCE THE EFFECTS OF HARD WATER

ProMate® 6.0
WATER CONDITIONING SYSTEM

Water's Journey From Sky to Faucet

As rainwater makes its way through the ground and into our waterways, it picks up minerals like calcium and magnesium. Left unsoftened, hard water leaves skin itchy, makes towels and clothing scratchy and causes mineral scale buildup on fixtures and in appliances.

Benefits of ProMate 6.0 Water Softening

-  Softer, itch-free skin and more manageable hair
-  Better lathering detergent, shampoo and soap
-  Brighter, softer towels and clothing
-  Spotless dishes and glasses
-  Cleaner fixtures and stain-free sinks, tubs and showers
-  Longer lasting water-based appliances and fixtures

ProMate 6 Softener Reduces:

- Calcium
- Magnesium

It's clear. Removing hard minerals from your home's water makes a difference you and your family can feel, see and appreciate.

ProMate 6.0

SOFTEN WATER EFFECTIVELY AND EFFICIENTLY

Built with durable commercial-grade resin and a unique Vortech™ distribution plate, the ProMate 6.0 saves on water usage and salt consumption, all while maintaining cost-reducing ENERGY STAR ratings.

SYSTEM FEATURES:

- 💧 Premium 10% commercial-grade resin beads
- 💧 Corrosion-resistant control valve, body and tanks for a longer life
- 💧 Easy-to-read, back-lit display with customizable settings
- 💧 Variable reserve that automatically adjusts to changing water usage
- 💧 Full-flow bypass valve for the convenience of bypassing the water softener
- 💧 Lead-free internal components

HOW THE PROMATE 6.0 WORKS

- 1 As hard water moves through the tank, resin beads attract and collect hard water minerals by exchanging them with sodium.
- 2 As water passes through the resin bed it's softened and ready for use.
- 3 When the resin beads become saturated with hard water minerals, the regeneration cycle flushes them with brine solution, recharging the beads with sodium ions. Hardness minerals and excess brine are rinsed down the drain.

ProMate 6.0: for Superior Performance

The ProMate 6.0 is made with better technology and fewer parts. This means fewer problems and maintenance calls.

Superior flow technology

- Vortech™ distribution plate leverages more surface area for superior performance
- Saves up to 20 gallons per regeneration cycle

Durable commercial-grade resin

- 10% resin beads last longer than 8% resin used in most systems
- Stronger resin means less salt and water usage
- Maintains better pressure over the life of the softener
